New softball stadium headed to Killian Complex ***-Pellham Phillips selected as architect-***

(Springfield, MO) Larry Phillips, President of Pellham Phillips Architects and Engineers, announced today that they have been selected by Springfield-Greene County Parks & Recreation to design the new Killian Softball Complex.

Renovation of the complex includes updating one field with permanent seating with 500 chair back and 500 permanent bleacher seats with the opportunity to bring in portable bleachers if needed for crowds over 1000 spectators. The upgrade will service the weekly Park Board leagues, programs, tournaments and national tournaments which are held on a yearly basis. In addition, the stadium field will be a new home for the Missouri State University Lady Softball Bears for their home games and tournament play. The new stadium will be LEED certified. In addition to seating, the stadium will feature field improvements, upgraded lighting, a training room and two locker rooms plus restrooms. Other complex improvements include new field scoreboards.

Funding for this project is from voter approved 2006 county-wide Park Sales Tax Project.
